No. 6

NEW GYMNASIUM ASSURED

The promoters of the new University Gymnasium feel keen pleasure in exhibiting in the present issue of the Courier the floor plans of the proposed building. This pleasure springs as well from the confident assurance that these plans are to become a reality, and what is better, an early reality, as from the remembrance of the good-natured skepticism voiced quite freely last fall by students and Alumni, when agitation for the project was begun. All through the winter months there was no interruption in the preliminary work for the campaign to raise funds, and no let-up in gathering ideas for the building. The latter work has resulted in the plans outlined herein. It is believed that these plans represent the most serviceable type of gymnasium for the University's needs. At any rate they represent a synthesis of the best ideas that expert advice in gym construction had to offer.

At the outset the question of a site presented some puzzling difficulties and their discussion and eventual solution resulted in the present plans. Many sketches were drafted by the architect for a building on the present tennis courts, but so many objections persisted in recurring that this site was abandoned for the terrace at the north end of the Campus, overlooking the athletic field. This ground has two strong recommendations: its proximity to the field, without trespass on the field, and the fact that it serves no purpose at present and will never be suitable for any other building than a gymnasium. The two lots which formerly intervened between the terrace and Creighton Field have lately been acquired by the University and will be incorporated in the field.

The terrace is 23 feet above Burt street and stretches from the athletic field to 24th street, a distance of 300 feet. Located on this elevation, the building with a frontage of 93 feet will face west and extend eastward 250 feet along and above Burt street.

The construction throughout will be

fire-proof material—steel and concrete faced with dark-red brick. Architecturally, the treatment of the exterior will be quite simple, dispensing with all highly ornate effects, for the reason that in planning the building, preference was given to serviceableness and durability over decorative features. However, it will not lack all artistic design. The very proportions of the building, generous and well balanced, and enlivened by consistent variation in color and lines, will beget a sense of grace and strength and completeness. The plans show the three floors of the interior. The appointments will be up-to-date in every respect and the athletic and recreative facilities unusually comprehensive for a college gym. Here choice was made of those features that have sustained their popularity in the best gymnasiums and athletic clubs in the country. How liberal has been the effort to provide for the needs and tastes of all, a glance at the plans will reveal. These call for a large gym floor, a running track, five hand-ball courts, two squash-courts, a boxing and wrestling room, a swimming pool, bowling alleys, a billiard room, two club rooms, a team room, physical examination room, offices for the director, a locker room, showers, toilets, and store-room.

A word or two descriptive of some of these features will be of interest. The large gym room will be on the second floor and easily accessible from all parts of the building as well as from the main entrance. Its dimensions are 170x90 feet, with a height of 33 feet in the clear. The floor will be of maple and provides ample space for three regulation basket-ball courts. Eleven feet above the floor and encircling the entire room will be a nine-foot running track with cork covering. Spiral staircases at either end lead from the main floor to the running track above and the locker room below. Removable apparatus of the best type will be installed according to needs. This great hall is to be lighted by windows on two sides, both above and below the running track and by a skylight set in a monitor roof. On the east and west ends of the building are the courts for various games, seven in all. The number is large and at first may appear unduly so. But the appeal of court games, notably of

hand-ball, is wide, attracting greater numbers than any other feature of a gymnasium that possesses them. Two of these courts for hand-ball have regulation dimensions, 60x25 feet, with a height of 26 feet. Approximating very closely the requirements of a racquet court, they may serve as such if this game ever wins devotees. The three other hand-ball courts, although smaller, provide adequate playing space: one is 45x24x26 feet, and the others 32x20x24. The two squash courts have regulation dimensions, 32x16½x24. Needless to say, these, too, may be used for hand-ball.

The swimming pool is located on the first floor at the east end of the building and conforms in size and appointments with the average large pools of the best gymnasiums of the country. It is to be a tiled tank 75x30 feet, fed by the new circulating system of filtered water. Repeated analysis has demonstrated that the water in pools of this type, even after the pool has been in use for some days, is more sanitary than the water freshly drawn from the ordinary hydrant. The depth of the water will vary from 3½ to 7 feet. Between its surface and the ceiling above will be a splendid reach of 18 feet, securing a large volume of air for the room—a vital point emphasized by experts. Overlooking the pool on two sides is a visitors' gallery, and adjoining it, but separated by walls to keep out steam, are the general showers and dressing-rooms. Back of these is the large locker room, which will provide space to accommodate an almost indefinite expansion of membership. The Kansas City locker system will likely be installed, as it secures better sanitation and a fuller control of the locker-room than any other. By this system, towels, soap, soiled uniforms and other germ carriers are excluded from the lockers and kept in individual boxes, cared for by an attendant. A part of the general locker room will be partitioned off for the use of Alumni members. The Varsity squad will have its dressing quarters in the team room, equipped with lockers, showers and toilet.

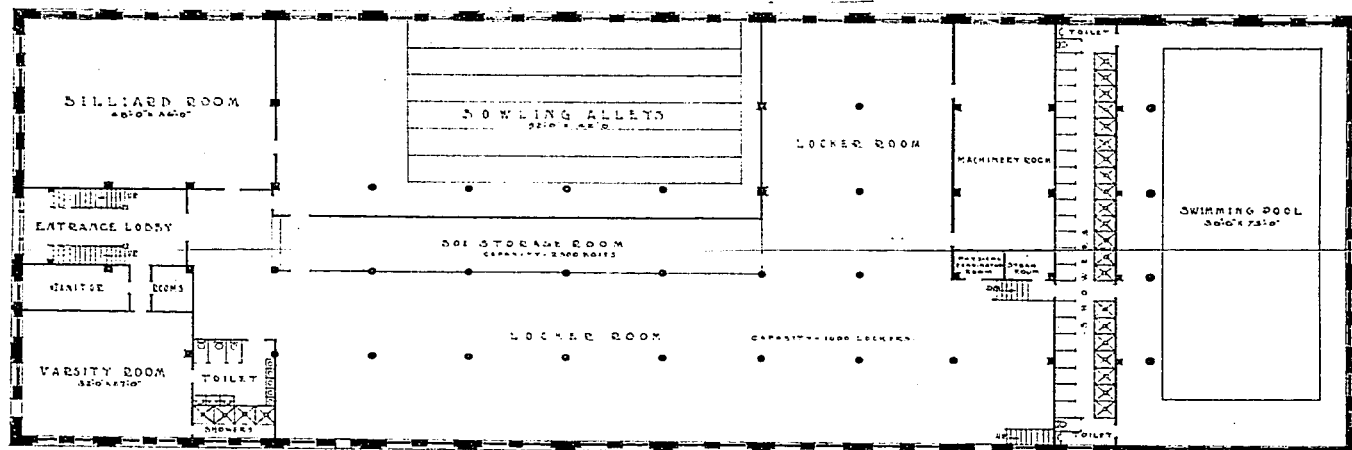

In designing the building the policy was adopted of making the gymnasium attractive to as many as possible by providing means of recreation for all tastes, even for those who have little relish for gymnastics or strenuous play. Hence several club features

were embodied in the plans; these are a billiard room with space for six or eight tables, a bowling room with six alleys, and two club rooms where friends can meet and small gatherings be held. The Glee Club and Orchestra will find one of these rooms admirably suited for their rehearsals. Eventually, the other may be converted into a subsidiary gymnasium for irremoval apparatus, should the large gym room ever prove inadequate to meet all demands. Minor appointments will be modern and the best.

When the building is completed the University will possess a splendid athletic club house, something decidedly more than a mere gymnasium. This in most colleges embraces only two of the above features, viz., the large gym floor and the swimming pool, with their necessary equipment. The motives which are promoting the erection of a building on such generous lines, summarized, are these: first, to promote the physical development of the students by offering attractive facilities for physical exercise and recreation; second, to unify the student body by providing a common center of interest where the men of the various departments can commingle and grow to feel that they are one body, bound together by the mutual ties and loyalties that come of fellowship in the same school; lastly, to stimulate and sustain a more uniform and a healthier interest in the realm of athletics. Membership, however, will not be confined to present students alone. Former students will be most welcome, and it is confidently expected that all of the Alumni residing in Omaha and its vicinity will avail themselves of the fine advantages of membership.

There is every reason to believe that the building will be under roof before winter, as work is to be begun at once. Whether or not it will be completed in time for any of the winter sports of 1916 will depend largely upon weather conditions during the coming fall.

The campaign for funds has progressed nicely, and little doubt is entertained that the Alumni will realize the quota which their executive officers proposed last winter, i. e. \$25,000.00. The building will cost between \$80,000 and \$90,000. At the present writing no figures have been submitted by contractors.

larger group both in numbers and influence as are to follow the building of the gymnasium to the University equipment.

NIGHT LAW CLASSES

Since September 1st, 1914, the Department has offered instruction in a four-year Night Course in addition to its regular three-year Day Course.

According to a recent report made to the American Bar Association by its Committee on Legal Education and Admissions to the Bar there are thirty law schools in the United States having night courses only, and ten other schools with both day and night classes.

With any system of education, the night school has its place, and that is not unimportant one. That which is desired to emphasize is that in view of the large number of students the night school attracts and is intended to accommodate a night school cannot in a period of three years cover in a satisfactory manner and with the thoroughness that is to be desired the same ground which in a like period is covered by the day school.

There is considerable difference of opinion among those in charge of both day and night law schools as to the proper amount of work per week which should be required from the students.

In conducting its night classes Creighton has no desire to cheapen legal education, or to provide an easy means of gaining admission to the bar.

Law schools in which instruction is given in the evening have been established in different parts of the United States in recent years.

led the public authorities in so many of our cities to open night schools for instruction in the common school branches of knowledge.

In so far as the night schools afford an opportunity to persons who have the requisite qualifications, but who for financial reasons cannot attend the day schools, they render a distinct public service.

As part from the opportunities afforded by the night classes for getting instruction in the law to those whose other employment prevents day study, it is believed that the night course will appeal very strongly to those persons who for one reason or another have been unable to secure as much preliminary training as they desire.

THE OBSERVATORY

Building. The Observatory consists of an equatorial room 12 1/2 feet in diameter, capped by a hemispherical dome, and a transit room 15x15 feet, connected by a short passage.

6 1/2 degrees north, west of Greenwich and its latitude 42 degrees 15 minutes 5.8 seconds north and its axis is 122 feet or 244 meters above sea level.

The location of the Observatory was determined as well by private observations of stars, as by connection with primary station of the United States Coast and Geodetic Survey about a mile distant.

Equipment. A Stewart five-inch equatorial telescope is provided with divided circles, a driving clock and a Steinheil grating and a Zeissler star spectroscopic and a Gaertner position micrometer.

A modified two-inch Stewart altazimuth carries a double eyepiece micrometer and a zenith level.

There are also a Fauch chronograph, a Heinrich chronometer, two sextants with a Curtis artificial horizon, a double-mirror heliostat, Bailey's astral lantern, fifteen-inch Josiah globes, a variety of eyepieces and other attachments.

The building is lighted by sixteen-candle-power electric lamps, and the instruments by one-candle-power lamps.

Foundation. The equatorial was purchased in 1884 and permanently mounted in 1886. The transit was set up in 1887, and the clock vault built in 1889.

SECOND FLOOR PLAN OF THE NEW 'VARSITY GYMNASIUM.

THE OBSERVATORY.

(Continued From Page Two)

the instruction of students. Besides the regular students in the college course of astronomy, there have been special and advanced ones, mostly during the vacation months.

Secondly, to subserve the zeal of its directors. This has depended upon their own inclinations and the time they could spare from other duties. In following this inclination the directors have given their attention to the observation of occasional phenomena and to writing for the standard astronomical journals and for several popular magazines.

Recognition. The Observatory was first noticed in the report of the Smithsonian Institution of 1885, then in those of 1886 and 1888, and was placed upon its official list of the world's observatories in 1902. It is described in the Congressional Record of the 56th Congress, first session, by Hon. W. E. Chandler in his speech of April 11, 1900. It is listed in Popular Astronomy, No. 75, and in the Revue des Questions Scientifiques in 1906. It appears in Les Observatoires Astronomiques and les Astronomes issued by the Observatoire Royal de Belgique in 1907, and since 1910 it is to be found on the American Ephemeris list. In January 1913 the present director was elected a Fellow by the American Association for the Advancement of Science. His determination, from the position of a shadow, of the time of exposure of a certain photograph in a criminal trial, has been published everywhere, and has met with due appreciation from astronomers and the public alike.

'VARSITY ATHLETICS.

The University encourages athletic sports in so far as they tend to promote the physical and moral development of the student. Kept within the proper limits they are a source of recreation and healthful exercise and help toward implanting in the character habits of gentlemanly self-repression, which cannot be disregarded in any system of education. The University officers, however, are keenly alive to the fact that athletic sports will not be productive of good, when they become a separate and recognized department of the University, with a corps of managers, coaches and trainers, having the sole object of winning in inter-collegiate contests at any cost, by clean methods or foul. Athletics so conducted are apt to stamp out the main spirit of generous rivalry which ought to characterize such contests, and be a constant incentive to coarse behavior and brutal tactics. On the same basis of operation university athletic managers to maintain the prestige which former victories have brought, are, in a certain sense, compelled to resort to means in recruiting their teams which do not fall short of actual, if not technical, professionalism. To keep an influence so deteriorating from exerting an effect upon students, athletics are under the immediate control of the Faculty, which uniformly adheres to well-defined regulations in their management. A creditable standing in class is a requisite of eligibility to any of the University teams. Long schedules and trips which necessitate absence from class, are discouraged.

A spacious athletic field affords the students ample opportunity to enjoy the pleasure of a home ground. It meets all the requirements of college athletics. Besides the gridiron and the ball field, there are tennis courts

and hand-ball alleys. Its situation is most convenient, as it lies within easy reach of all the departments, and the Harney and Cuming street cars pass within a block of the main entrance.

Plans for a new Gymnasium building have been drawn. The erection of the building will be begun in the Fall.

COLLEGE DORMITORY.

The Creighton College Dormitory is intended for out-of-town students. The large number of such students attending the College and the difficulty of obtaining accommodations favorable to serious study had long caused much concern to the College authorities. With this Dormitory a beginning was made along lines calculated to allay all concern. The Dormitory provides students with board and lodging at reasonable rates and under conditions conducive to earnestness of application to college work. The discipline of the Dormitory is under the direct control of the College officials. While the authorities, in case the dormitory is filled, will assist students from a distance to find suitable homes at reasonable rates for board and room, they will not consent to act as guardians, nor in any way hold themselves responsible for the conduct of these students, when not actually under College supervision.

A private room can be had in the Creighton College Dormitory (St. John's Hall) for \$25.00, \$30.00 or \$35.00 per half year. The difference of price is based upon the location of the rooms. Payment must be made at the beginning of each term, i. e. in September and in February.

Board in the Dormitory this past school term has been \$14.00 per month, or \$3.50 per week, payable in advance. This price will be maintained unless the cost of living should increase notably. Residents in St. John's Hall

who have finished the Freshman College year may board in the Hall or elsewhere as they prefer. All other residents will board in the Hall.

A deposit of five dollars is to be made at entrance as security against damage to furnishings of the rooms. This deposit is returnable.

Comparative statement of the expenses of a student residing in the Dormitory for the academic year, September to June 20th.

	Low	Average	Liberal
Tuition	\$000.00	\$000.00	\$000.00
Books, Stationery, etc.	6.00	9.00	12.00
Residence	50.00	60.00	70.00
Board	133.00	133.00	133.00
Laundry	12.00	20.00	32.00
Students' Fee	5.00	5.00	5.00
Total	\$206.00	\$227.00	\$252.00

MEDICAL CLINIC.

The clinic and dispensary of the College of Medicine occupy the first floor of the south wing of the college building. Here are a large waiting room for patients, and the clinical rooms, which communicate directly with the waiting room.

Clinics are held in the college dispensary rooms six days each week. There have been established the following departments: A Clinic of Medicine, Diseases of the Chest, Surgery, Diseases of the Eye, Ear, Nose and Throat; Diseases of Children, Skin, Genito-Urinary, Venereal Diseases, Diseases of Women, and Neurology.

The material is utilized for the benefit of the student, and ample opportunity is accorded to examine patients under the direction of the physician in charge, and instructions are given in the use of instruments and methods of making a diagnosis.

A trained nurse is in constant attendance at the dispensary to assist in the care of patients and in examinations and management of cases.

THIRD FLOOR PLAN OF THE NEW 'VARSITY GYMNASIUM.

PUBLIC SPEAKING.

The ability to express thought is to no one more valuable than to the lawyer. No matter how learned he may be, his learning will be worthless in the practice of his profession unless it be coupled with the ability to communicate it clearly and intelligently to another, be that other a client, a judge or a jury. A lawyer need not be an orator, but to attain even mediocre success he must be a ready and convincing speaker.

In the Creighton College of Law, the art of public speaking is fostered in the course on that subject and in the Model House, which is offered as a substitute for the old-fashioned debating society, and is modeled, so far as the limitations will permit, upon the National House of Representatives, and incidentally, of course, embodies the essential features of the legislature of the state.

The House is conducted in strict accordance with parliamentary rules. Committees are organized, bills of present-day interest introduced, referred to committee, reported, discussed and disposed of; in fact, the aim is to make the work as realistic and practical as possible.

Each student in the school is required to attend the sessions of the House and is expected to participate in debate. The Speaker is elected from the Senior Class by the entire student body, and two clerks are elected, one each from the Junior and Freshman Classes. The Speaker presides at all meetings, but resigns the gavel to first one and then another senior during the deliberations of the Committee of the Whole. One of the clerks reads the bills offered for consideration and the other keeps a journal showing in detail the work of the House. A member of the faculty is present at every meeting to extend such help as may be called for. The officers of the House for the year 1914-1915 were: Speaker, Mr. Louis D. Kavanagh, South Omaha; Chief Clerk, Mr. John V. Beveridge, Omaha; Journal Clerk, Mr. A. L. Svrgard, Cedar Rapids, Nebraska; Sergeant-at-arms, Mr. John J. Shannon, Jersey City, N. J. This organization has many advantages over the ordinary debating society. It affords more individual opportunity; the character of the work furnishes more incentive and inspiration for extempore speaking; it fits the students for their duties in public assemblies; it gives them, while studying the law, an insight into the method of making laws, and it develops a quickness of thought and a readiness of expression which cannot but prove invaluable.

The work of the Model House is of obligation for all students.

HOSPITAL APPOINTMENTS.

The Creighton College of Medicine has the exclusive privilege of furnishing internes to a large number of hospitals in Omaha and throughout the country, and as internship affords the greatest possible opportunity to the graduate in medicine to extend his medical and surgical training, a position for one or two years in a hospital under the most experienced physicians and surgeons is most highly prized by all recent graduates in medicine. The appointment as interne secures service in a hospital with furnished room and board.

Appointments are made the result of a competitive examination to Omaha hospitals to which only graduates of the Creighton College of Medicine are eligible, and by appointment to distant hospitals to those graduates showing the highest scholarship and general character.

The following graduates received appointments May 1, 1915:

- St. Joseph's Hospital, Omaha, Dr. C. R. Atzen, Dr. A. F. Srb, Dr. C. S. Moseed, Dr. O. P. Morganthaler, Dr. L. E. Vandiver, Dr. N. H. Rasmussen, St. Joseph's Hospital, Denver, Colo.,

Dr. J. J. Young, Dr. J. R. Kleyla, Dr. J. C. Hubenbecker, Dr. J. W. Brophy, St. Vincent's Hospital, Portland, Ore., Dr. F. P. Murphy, Dr. J. H. Murphy, Dr. A. A. Conrad,

Railroad Hospital, Topeka, Kans., Dr. J. L. Thomas, Dr. A. Rhonalt, Dr. A. W. Cecha,

Bethesda Hospital, St. Paul, Minn., Dr. J. Larson, Dr. R. A. Smith,

Columbia Hospital, Pittsburg, Pa., Dr. E. N. Pender, Dr. O. Rips,

Railroad Hospital, Salida, Colo., Dr. H. S. Rogers, Dr. J. J. Srb

Swedish Mission Hospital, Omaha, Dr. J. Alquist,

Swedish Mission Hospital, Minneapolis, Minn., Dr. J. Anderson,

Mercy Hospital, Des Moines, Ia., Dr. G. B. Brown,

St. Mary's Hospital, San Francisco, Cal., Dr. R. F. Farrell, Dr. Raymond McNamara,

St. James' Hospital, Butte, Mont., Dr. W. P. Hombach,

St. Mark's Hospital, Salt Lake City, Utah, Dr. F. H. Kinyoun,

St. Margaret's Hospital, Kansas City, Kans., Dr. J. P. Sheehy,

St. Joseph's Hospital, Tacoma, Wash., Dr. J. F. Kelly,

St. Joseph's Hospital, St. Paul, Minn., Dr. F. J. Traxler,

Mounds Park Sanitarium, St. Paul, Minn., Dr. A. Edstrom,

Mercy Hospital, Council Bluffs, Ia., Dr. H. A. Rasmussen,

Deaconess Hospital, St. Joseph, Mo., Dr. Wm. Roney,

Douglas County Hospital, Omaha, Dr. F. D. Ryder,

Northern Pacific Hospital, Missoula, Mont., Dr. S. E. Simpson.

PHARMACEUTICAL DISPENSARY.

This course follows the course in Manufacturing Pharmaceutical Chemistry and continues twelve weeks, ten hours per week. It is placed last in the course in order to give the student the benefit of all the knowledge acquired in the previous course, in developing the most important and practical part of the pharmacist's art, the art of dispensing.

A careful study is made of the prescription as to its purpose, its parts, and the proper course of procedure upon receiving a prescription. Extensive practice is given in reading and criticising prescriptions of every character. The student is also required to write a number of typical prescriptions. A great amount of practice is given in filling prescriptions involving difficulties of every kind. The order of receiving, filing, checking, pricing and recording prescriptions in the Dispensing Laboratory is the same as is in use in the best prescription pharmacies. Full instruction is given as to the proper selection, care, and use of all materials used in dispensing. Methods of weighing, measuring, pasting and labeling, wrapping, cleaning of utensils, arrangements of prescription case, etc., are all thoroughly taught by theory and by an abundance of practice.

Systematic instruction and an abundance of practice is given in making and dispensing the various kinds of mixtures, pills, emulsions, powders, suppositories, ointments, cerates, plasters, confections, lozenges, troches, cachets, kouscats, hard and soft capsules, bougies, etc.

Most careful attention is given to incompatibility of every kind—therapeutic, pharmaceutical, and chemical—and the methods of overcoming the same. This course of instruction is supplemented by practice in our model prescription department, in which bona fide prescriptions for the patients of the free dispensary of the Medical College are filled.

All the prescriptions written for patients at the free dispensary of Creighton Medical College are filled by students of the College of Pharmacy under the supervision of one of the instructors. A model prescription department is fitted up especially for

this work. The Senior Class is divided into small sections and each section does this practical work for a given period. Perhaps as great variety of prescriptions is filled in this department each day as is filled in any one of the city stores, since a large number of the leading physicians of the city do work in the free dispensary. Students are required to make nearly all materials used in this department. It affords a large amount of practical experience which is of great value in business.

ARTS FACULTY.

The faculty list for the College of Arts and Sciences was posted Saturday, July 31st. Its personnel remains practically unchanged. Mr. Martin Phee, S. J., who has just completed two years of special work in Biology at the St. Louis University, is the only new member of the college faculty. A new system will be inaugurated this coming year—new, in so far that it will now be applied to all branches of studies. Each professor will teach his own particular branch. Heretofore, this system has been followed out in regard to Philosophy, History, Physics and Mathematics. The same plan will henceforth also hold in regard to all subjects taught in the college. The faculty list is as follows:

- R. M. Kelly, S. J., Dean of the Department.
W. J. Corboy, S. J., Moderator of St. John's Hall and Director of Athletics.
T. F. Wallace, S. J., Professor of Philosophy.
J. E. Barlow, S. J., Professor of Latin.

W. F. Rigge, S. J., Professor of Physics and Astronomy.

L. J. Puhl, S. J., Professor of Chemistry.

M. J. Phee, S. J., Professor of Biology.

W. J. Quinlan, S. J., Professor of Mathematics.

W. J. Harrington, S. J., Professor of Greek.

A. R. Wise, S. J., Professor of English and Public Speaking.

A. Kaufmann, S. J., Professor of History and German.

F. B. Cassilly, S. J., Professor of Education.

J. B. DeShryver, S. J., Professor of French.

Hugh Gillespie, A. M., Professor of Political Economy.

LAW PRIZES.

To the students of the first and second year day class and of the first, second and third year night class who attains the highest general average for the work of his class, provided such average is at least ninety per cent, and the student has attended at least ninety per cent of the lectures given to his class, a free scholarship good for one year's tuition will be given. The names of the successful students will be announced within the first ten days of the school year succeeding that in which the scholarships were merited.

In 1914-15 the Day Freshman Scholarship was awarded to Edward J. Svoboda and the Night Freshman Scholarship to C. E. Childs. The Day Junior Scholarship was awarded to E. J. Mitchell and the Night Junior Scholarship to M. J. Ryan.

Through the kindness of Callaghan & Company of Chicago, a book prize, consisting of a copy of the Cyclopaedia Dictionary is offered to that member of the graduating class who attains the highest general average for the class work, Moot Court and Model House, provided such average is at least ninety per cent.

Commencing next year a book prize offered by The American Law Book Company, consisting of a complete set of the Cyclopaedia of Law and Practice, with its annual annotations to date will be awarded on these same terms to the leader of the graduating class.

ADMISSION TO THE BAR.

The Nebraska legislature of 1907, passed a bill permitting law school graduates approved by the Supreme Court to present their graduates for admission on motion without examination, provided that no school should be accorded this privilege which was not a member of the Association of American Law Schools. The following copy of a decree of the Nebraska Supreme Court, under date of December 3, 1907, is self-explanatory:

Supreme Court of Nebraska, September term, 1907, Dec. 3.

In the Matter of the Creighton College of Law.

Now, on this 3rd day of December, 1907, this matter having come on to be heard on the application of the Creighton University, and the showing filed in support thereof, the Court finds:

First—That Creighton College of Law is a department of The Creighton University.

Second—That said Creighton College of Law is a college of law in this state, having entrance requirements and a course of study equal and equivalent to those of the law school of the University of Nebraska.

Third—That said Creighton College of Law is a member of the Association of American Law Schools.

It is therefore considered and ordered by the Court that Creighton College of Law be, and the same hereby is designated as a college of law whose graduates shall be admitted to the bar without examination.

(Signed) S. H. SEDGWICK, Chief Justice.

Omaha

150 Professors Over 1000 Students

COLLEGE OF LAW.

Founded in 1904. Three Year Day and Four Year Night Courses leading to LL. B. degree. Diploma admits to practice. Library of 10,000 volumes. Exceptional court facilities.

COLLEGE OF MEDICINE.

Founded in 1892. Large staff of professors trained at home and abroad. Building and equipment valued at quarter million dollars. Clinic unequalled in this vicinity. Twenty internships open to graduates.

COLLEGE OF DENTISTRY.

Founded in 1905. High standards. Personal attention given to each student. Opportunities for infirmity practice exceptional. Thoroughness and efficiency aimed at.

COLLEGE OF PHARMACY.

Founded in 1904. Elegantly housed in specially designed and equipped building. Unusual opportunities for practical experience.

COLLEGE OF ARTS AND SCIENCES.

Founded in 1887. Thorough courses leading to A. B. and B. S. degree. Special advantages in Pedagogy. Tuition free.

ASTRONOMICAL OBSERVATORY.

Opened in 1885. Complete equipment for astronomical instruction and research.

HIGH SCHOOL.

Founded in 1878. Splendid building and equipment. Advantages of association with university students. Tuition free.

POST GRADUATE SCHOOL

offers opportunities for advanced work along various lines.

SUMMER SESSION

includes instruction in courses required for State Teachers' certificates and in undergraduate and professional subjects for degrees.
