Dooly was up Monday and we were just wondering if you were washing or not then we decided that you probably were sleeping as yet.

Dooly said she was going to write and tell you what had happened to her at school, if she don't say just ask her - some thing Dooly did not think was funny but I came to the rescue and helped Dooly out.

See darling it is hard for me to write any kind of a letter this evening - I just feel sort of queer that all I sure wish that the state Board exams were over.

How it really seems funny
to have you home so early
this year, you usually did
not get home until the middle
of June last year.

If I can't find a location
I think I shall go to Minneapolis
and take a post graduate course
in Nitrous Oxide anesthesia
the course is free to all who
buy a gas machine, so if I
can't locate I think probably
that is what I will do.
Any how if I do I think I
will take the course later on
and on my way home I
can stop at Burlington
and I
