-A short (fewer than 500 words) poster abstract suitable for public distribution. Fiscal constraints and regulatory pressures demand that higher education engage in increased accountability. Administrators are challenged to implement robust and effective measures of academic accountability. Academic program review process provides an opportunity for an institution to evaluate its academic programs, reflect on and refine its mission and vision, and exchange ideas and best practices to strengthen existing programs. Creighton University implemented a structured institutional process for program review that incorporates a virtual web-based format for external reviewers. The poster will share the process, tools, and outcomes to highlight the lessons learned during the first year of new program review process.
