## Baby's Growth

**T**HE best indication of proper development is a right increase in weight coupled with increase in muscular strength.

At five months Baby should be able to hold his head erect. At seven months he will be able to sit up a while. When ten months he crawls, pulls himself up or stands by a chair.

Do not encourage a child to walk before he does so of his own accord.

# The Allenburys Foods

Nos. 1, 2, 3 and Rusks provide the right nourishment for Baby, step by step, and promote sturdy growth and sound development
